DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leonid Thenor on 4/23/2007.

The application has been amended as follows:

Claims 20-22, 24-29, 42 and 50-54 have been cancelled.

2. The following is an examiner's statement of reasons for allowance:

Independent claim 16 recites the uniquely distinct feature for "said copy permission period specifying a predetermined time period for permitting said digital information recorded on said first recording medium to be copied and recorded only once from said first recording medium onto a second recording medium different from said first recording medium after recording of said digital information on said first recording medium" and "said move permission information permitting said digital information to be moved to said second recording medium on the premise that at least a part of said digital information on said first recording medium is disabled for playback, even when said digital information is inhibited from being copied and recorded from said first recording medium onto a second recording medium different from said first recording medium"; **Independent claim 17** recites the uniquely distinct feature for "said digital

information including information of a copy permission period specifying a predetermined time period for permitting said digital information to be played back and recorded only once from said first recording medium to a second recording medium different from said first recording medium after recording of said digital information on said first recording medium” and “said digital information further including move permission information for permitting said digital information to be moved to said second recording medium on the premise that at least a part of said digital information on said first recording medium is disabled for playback, even when said digital information is inhibited from being copied and recorded from said first recording medium onto a second recording medium different from said first recording medium”; **Independent claim 41** recites the uniquely distinct feature for “said copy permission period specifying a predetermined time period for permitting said digital information to be only once copied and recorded onto a second recording medium different from said first recording medium following recording of said digital information on said first recording medium” and “said move permission information permitting said digital information to be moved to said second recording medium on the premise that at least a part of said digital information on said first recording medium is disabled for playback, even when said digital information is inhibited from being copied and recorded from said first recording medium onto a second recording medium different from said first recording medium””.

The closest prior art, Ichimura et al (US 6,034,832), Kuroda (US 6,707,774), Kuno et al (US 6,584,552) and Kawara et al. (US 6,278,836) teach systems that allow restriction

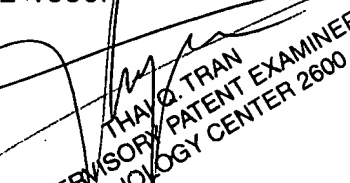

periods for reproduction and copying of video materials, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gelek Topgyal whose telephone number is 571-272-8891. The examiner can normally be reached on 8:30am -5:00pm.
